DETAILED ACTION

This second Office Action is in response to Applicant's Amendment received in the Office on January 30, 2004 in this case.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the sign must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 5-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brault (5,220,740), in view of Keats (3,119,588), and Teets (6,401,658). Brault teaches, substantially, each feature of the claimed invention. Brault does not teach a plurality of through holes in the post or a post hole aligned with a collar hole. Keats, however, teaches a post having space apart through holes (41) and Teets teaches a fastener (28) through aligned through holes (30). It would have been obvious to one of ordinary skill in the art at the time of invention to modified Brault to have multiple holes for adjusting the height of the sign (20) as taught by Keats. It would also have obvious to have modified Brault to better secure Brault's post (18) to Brault's collar by using a fastener into through holes in the collar and post (18) as taught by Teets who fastens two telescopic items together in this way in order to better releasably secure Brault's post onto Brault's base. Regarding claim 5, Brault teaches a handle (22). Regarding claim 6, Brault teaches wheels (12). Regarding claims 7, Brault teaches filling with water (See col. 3, Ins. 25-30). Regarding claim 9, Brault's openings are all "sealable".

Examiner's Response to Applicant's Remarks

Applicant's arguments with respect to claims 1 and 5-9 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
